Subject Index

Anthropogenic alteration of δ ^{13}C signatures 139
Atmospheric pollution 255
—, mutagenicity of emissions from wood stoves 199

Biogeochemical processes, in sediments, algal mats and surface and interstitial waters 175
Biogeochemical process studies, use of alkalinity 187
Blood-lead, indicator of exposure to lead 225

Chemical defences, diterpenes of marine brown algae 109
Chemistry of stagnant sulphidic basin waters 161
Chemotaxonomy, use of Dictyotaceae diterpenes 109
Copper, adsorbtion from solution by sediments and microbial material 55
—, interaction with organic complexing ligands 37
Critical pathway analysis, application to evaluation of metal pollution 73
Cupric ions, role in generation of superoxide ions 47

Diterpenes, as chemical defences 109

Fecal pollution indicators 151

Germanium, accumulation in tissues 237

Heavy metal contamination, of coastal waters 63
Heavy metal pollution 73
—, Pb-210 and Cs-137 195
Hydrochemistry of a major river 81, 89

Isotopic composition of sedimentary organic carbon, regulating factors 139

Lead exposure, reduction in indicated by decreased blood-lead levels 225
Lead fluxes to tropical marine systems 1
Lead, levels in teeth 231
—, regulating contamination 209

Marine pollution, indicators of fecal pollution 151
Multiple sclerosis, relationship with physical and chemical properties of soil 263
Mutagenicity, of emissions from wood stoves 199

Organic matter, nature and seasonal variability in major rivers 93
Organochlorine pesticides, seasonal fluctuations in aquatic systems 243

Pesticide pollution of aquatic systems 243
pH–temperature–nutrient relationships 117

Risk analysis, in regulation of lead contamination 209

Soil properties, relationship with prevalence of multiple sclerosis 263
Speciation studies in natural waters 9
Superoxide ions, photochemical generation 47

Transuranic radionuclides, radiation exposure to birds 273
Triazine pesticides, seasonal fluctuations in aquatic systems 243
